POSITION DESCRIPTION

GENERAL DESCRIPTION

Under limited direction, responsible for a broad range of both supervisory and technical tasks in the areas of municipal transportation engineering; responsible for the comprehensive planning, development, and coordination of a wide scope of complex engineering projects and departmental initiatives. May relieve Director, Deputy Director and/or Transportation Engineering Chief of administrative duties as required.

ESSENTIAL FUNCTIONS

Supervises engineering technicians in a variety of complex transportation studies; may supervise Engineers as directed.

As directed, may attend meetings and otherwise relieve Director, Deputy Director, and/or Transportation Engineering Chief of administrative duties.

Performs detailed comprehensive planning, development, and coordination of a wide scope of complex engineering projects and initiatives.

Designs complicated temporary and permanent transportation controls projects.

Develops, evaluates, or reviews plans and criteria for a variety of projects and activities; assesses feasibility of proposals.

Performs complex design responsibilities involving the preparation of plans, specifications, contract documents and cost estimates for municipal construction and maintenance projects. Performs City-wide planning responsibilities for municipal transportation engineering concerns.

Administers construction/maintenance contracts by performing or directing the performance of on-site inspections, specification interpretations and field adjustments, and overall project coordination with contractors, utilities, departments, and industry.

Provides supervision to professional and technical staff in the completion of plans and specifications, collection and monitoring of transportation data, and field inspections.

Performs plan and study review responsibilities to determine compliance with legal requirements and sound engineering standards.

Serves as a liaison with other City entities and the public concerning transportation engineering problems.

Oversees design and deployment of Advanced Traffic Management System (ATMS) projects.

MARGINAL FUNCTIONS

Performs related work as required.

KNOWLEDGE, SKILLS AND ABILITIES

Knowledge of the principles and practices of engineering.

Knowledge of current practices in the design and construction of transportation controls.

Ability to perform advanced investigations and surveys and to offer solutions to complex engineering problems.

Ability to supervise the work of subordinate technical personnel.

Ability to plan, assign, and review the work of others.

Ability to plan, design and supervise the construction of public works projects. Ability to secure adherence to construction plans and specifications.

Ability to express ideas clearly, concisely, and convincingly both orally and in writing.

Knowledge of the preparation of engineering drawings and the preparation of plans and estimation of construction costs.

Ability to prepare and maintain engineering records and to make concise technical reports.

Ability to establish and maintain effective working relationships with the public, developers, consultants, and fellow employees.

Knowledge of design and deployment of Advanced Traffic Management Systems.

Knowledge of the Manual on Uniform Traffic Control Devices (MUTCD).

PHYSICAL REQUIREMENTS

This position consists of primarily light work, requiring the incumbent to exert up to 20 pounds of force occasionally, and/or 10 pounds (or less) of force frequently, in order to lift/carry, push/pull, or otherwise move objects. The job usually requires walking or standing to a significant degree. A description of the specific physical requirements associated with this position is maintained on file in the Human Resources office for review upon request.

MENTAL REQUIREMENTS

This position uses logic and/or scientific thinking to define problems, collect information, establish facts, draw valid conclusions, devise and implement policies and regulations, and to manage and coordinate multiple programs or projects. A description of the specific mental requirements associated with this position is maintained on file in the Human Resources office for review upon request.

MINIMUM REQUIREMENTS

Must possess a Bachelor's degree in Engineering from a college or university accredited by the Accrediting Board for Engineering and Technology (ABET/EAC).

Must have at least two (2) years of engineering experience as a Registered Professional Engineer.

Must have at least two (2) years with supervisory and/or lead worker responsibilities over engineering personnel.

Must possess or obtain within the probationary period an appropriate Tennessee Driver's License as required by State Law.

AND

Possession of a valid Registered Professional Engineer's License issued by the Tennessee State Board of Architects and Engineer Examiners

OR

Possession of a valid Registered Professional Engineer's License issued by a comparable board in another state and obtain the Tennessee State Board of Architects and Engineer Examiners license within the probationary period.

PREFERRED QUALIFICATIONS

The hiring authority may give preference to candidates who possess additional years of directly related work experience and/or an advanced degree from an ABET/EAC accredited college or university.
