Mayor  
(865) 215-2040

## THE CITY OF KNOXVILLE, TENNESSEE

### **Introduction**

We are pleased to present the proposed Capital Improvements Program (CIP) for FY2019 through FY2024 which incorporates the FY2019 Capital Improvements Budget for 2019 and the Capital Improvements Plan for the ensuing five-year period for the City of Knoxville. This six-year CIP allows the city to identify the needs of the community and to prepare a long-term funding strategy to meet those needs. It includes any projects that involve needed repairs or improvements to our existing infrastructure (streets, parks, city facilities, etc.) and the acquisition or construction of new infrastructure with an estimated cost of \$10,000 or more.

The Capital Improvements Program is not to be confused with the Capital Improvements Budget. The Capital Improvements Budget is prepared each year in conjunction with the annual Operating Budget. It generally includes only those projects from the first year of the Capital Improvements Program that will be funded that year. The Capital Improvements Program incorporates the Capital Improvements Budget and lays the groundwork for meeting the future capital needs of the city.

The CIP is a collaborative effort involving all the departments of the city and recognizes known current and future needs of the city. It takes into effect the ability of the city to meet the financial requirements of the Program in an orderly and achievable manner as well as the ability to address needs within the limitations of existing staff.

### **What is a Capital Improvements Program?**

The Capital Improvements Program (CIP) is a prioritized, multi-year schedule of public improvements, including construction projects, as well as land acquisitions and major equipment purchases. The CIP covers a six-year period and sets the policy framework within which capital improvements will be made. The program is one of the processes utilized to achieve desired urban growth and development. By providing a planned schedule of public improvements, the program outlines present and future public needs and intentions which have a positive influence on private investment decisions. The coordination of orderly and efficient programs of private and public investment can thus be developed for the maximum overall public benefit.

The CIP provides the principal tool for coordinating physical and financial planning, but it should not be considered a final and fixed plan. A meaningful measure of its usefulness will be its effective application as a process. The projects listed in the first year of the program form the Capital Budget. The Capital Budget may be amended by City Council during the fiscal year. The full CIP is reviewed and revised each year. An additional year is added to maintain the full five-year period of the program.

### **Reasons for Preparing a Capital Improvements Program**

A CIP provides for the orderly and systematic financing and acquisition of public improvements. It also provides: (1) information for individual taxpayers, neighborhood associations and other civic groups interested in the City's development plan; (2) a statement of intention for Federal and State agencies that provide grants-in-aid to the City; and (3) a source of information for potential investors who may purchase municipal securities.

There are several advantages to protecting and scheduling capital improvements in advance of actual needs:

- Reduced need for "crash programs" to finance the construction of City facilities.
- Budgeting within a system which assures that capital projects will be built according to a predetermined priority system while planning in advance for the revenue needed to finance and complete these capital projects.
- Advanced planning to ensure that projects are well thought out in advance of construction.
- Scheduled purchasing commensurate with favorable market conditions.
- Maximized coordination with the City's Operating Budget. An important aspect of capital improvement planning is the effect capital expenditures have on the annual operating costs of the City. For example, once a new facility is completed, operating costs (such as staffing and maintenance) are an on-going expense.

### **Authorization**

Authorization of CIP and Budget for Knoxville is found in the City Charter of Knoxville establishing the Capital Improvements Programming and Capital Budgeting Process.

Article VIII, Section 801 C provides:

#### *C. Capital Improvements Program*

1. *The Mayor shall have the Metropolitan Planning Commission annually prepare a Capital Improvements Program of proposed capital expenditures for the ensuing fiscal year, and the next five (5) fiscal years thereafter, accompanied by the report and recommendations of the planning commission.*
2. *The Mayor or an agent of the Mayor shall obtain annually from all officers, departments, boards and commissions and other agencies requesting funds from the City for capital improvements, such information as may be necessary in order to enable the Metropolitan Planning Commission to prepare a Capital Improvements Program. These data shall be delivered to the Planning Commission not later than four (4) months prior to the end of the fiscal year. The Mayor shall submit a capital improvements program and budget to the Council not later than forty-five (45) days prior to the commencement of the next ensuing fiscal year, and the method of financing them, noting the impact on the debt structure of the City, and shall include in the appropriate current operating budget any projects to be financed from current revenues for the ensuing fiscal year.*
3. *The Council shall have the power to accept, with or without amendment, or reject, the proposed program and the proposed means of financing. The Council shall not authorize expenditures for the construction or acquisition of any building, structure, work or improvement, unless the appropriation for such project is included within its Capital Improvements Program, except to meet a public emergency threatening the lives, health, or property of the inhabitants when passed by a vote of two-thirds [of the] members of the Council. The capital improvements program must be acted upon finally by the Council not later than fifteen (15) days prior to the commencement of the next ensuing fiscal year.*
4. *The Mayor may submit amendments to the Capital Improvements Program any time during the year, accompanied by the recommendations thereon of the Metropolitan Planning Commission, which amendments shall become effective when adopted by a vote of two-thirds of the members of Council.*

### **Participants and their Role in the CIP Process**

All departments, boards, commissions and agencies requesting funds or authorization to expend funds for capital improvements during the forthcoming fiscal year are required to participate in the capital improvements programming process. They have the primary responsibility for the initial proposal of improvement projects to be included in the program. The heads of these departments can most accurately assess future capital needs necessary to fulfill the departmental function and program. They are also able to determine project costs and the relative importance of each project. The departments must present a written budget request to the Mayor and have funding authorized by the City Council in order to implement the projects. Other participants in the process and their roles include the following:

#### **1) The Metropolitan Planning Commission**

The Metropolitan Planning Commission receives and reviews the Capital Improvements Program assembled by the City and coordinates project requests submitted by the various operating departments to remove or resolve any

conflicting projects in order to provide a balanced approach to public improvements. The Planning Commission recommends priorities for proposed projects based upon their conformance with the comprehensive plan.

## **2) Mayor and Staff**

The Mayor must consider the program recommended to her by the operating departments. It is her responsibility, with the aid of her staff, to determine the overall objectives and direction for the City and the administration's priority for submitted requests. The Finance Department is primarily responsible for reviewing the program and evaluating it in terms of the City's financial resources. The program which is submitted by the Mayor to the City Council reflects the administration's recommended plan for the coming year. The Mayor and her staff will re-evaluate the other proposed projects as funding becomes available.

## **3) City Council**

The City Council exercises the right of final approval of the CIP. It may, after considering the program submitted by the Mayor, require amendments or revisions. The Council's power for approval and adoption of the final program derives from the fact that only Council is authorized to approve the expenditure of public funds. Those projects approved for funding in the ensuing budget year become the Capital Budget. Once the City Council approves a Capital Budget and CIP, it cannot authorize expenditure of Capital Funds for projects not contained in these documents unless they are first amended by a two-thirds majority vote of Council.

### **Some Important Definitions –**

#### **Capital Improvement Project**

This is an item for which the purchase, construction, or other acquisition represents a public betterment to the community and adds to the physical worth of the City, provided that the project considered has an anticipated life of not less than one (1) year following its purchase, construction, or other acquisition, and has a project total cost of not less than ten thousand dollars (\$10,000). Whenever possible, each item which is a usable structure, separate facility, piece of equipment, or rolling stock should be designated as a separate project. An initial project includes all parts thereto; i.e., land, buildings, machinery and equipment integral to it and as such will be considered as a single capital project. This definition includes, but is not limited to the following:

#### **Land**

All expenditures for land regardless of whether or not they meet the dollar cost limitation set forth above, and whether they are for an interim holding in connection with a program of economic development or for a long-term public use should be included.

#### **Structures**

All expenditures for structures, including construction cost, feasibility studies, architectural, engineering, legal, and related expenses, and expenditures for major renovation of or additions to structures should be included.

### **Machinery and Equipment**

All expenditures for machinery, equipment, and furnishings that are built into and are an integral part of the structure at the time of initial acquisition or construction are to be included.

### **Capital Improvements Program (CIP)**

This is a plan for capital expenditures to be incurred over a six-year period to meet capital needs defined in the long-term work program of the departments and other City agencies. Thus, the program sets forth each proposed project in which Knoxville is to have a part, and specifies the full resources estimated to be available to finance the proposed expenditures.

### **Capital Budget**

The first year of the CIP becomes the Capital Budget. Included in the budget are the projects recommended by the Mayor and approved by City Council for funding during the next ensuing fiscal year.

### **City Goals**

At the beginning of her administration, the Mayor outlined several major goals. The FY 2018-19 budget is guided by these goals. These goals are the following:

- Strong, safe neighborhoods
- Living green and working green
- An energized downtown
- Job creation and retention

### **Understanding This Document**

Year one of the Capital Improvements Program is the basis for the recommended current year capital portion of the annual operating budget. The Program and the operating budget rarely are the same, as priorities change, and projects must be accelerated. Examples of priorities shifting include situations such as; additional funding offered from outside sources, advanced or slowed project schedules, and unanticipated or extraordinary events. The project total amount of the recommended capital improvements budget for any particular year cannot exceed the financial resources available for capital projects from the City's projected cash flow for that year. The following pages list the recommended capital projects for the FY 2018-19 Capital Improvements Budget (July 1, 2018 - June 30, 2019) and the following five years (FY 2020-2024).

**FY 2019-2024 CAPITAL IMPROVEMENTS PROGRAM**  
**Project Descriptions by Department**

**Project: Citywide New Sidewalk Construction**

This program is intended to fund new sidewalk construction in areas throughout the City in order to address safety issues and pedestrian needs and requests. Projects are selected from a list of projects prioritized by the Engineering Department. Improvements provide safe pedestrian access along City streets. The sidewalk rating system for project selection includes the following criteria: sidewalk projects within the school parental responsibility zones, missing sidewalk links, pedestrian volumes, accident history, etc. The list of candidate projects is updated annually.

**Administrative Goal:** Strong, Safe Neighborhoods
